January 22, 2009

SEATTLE — The Seattle District, U.S. Army Corps of Engineers will be conducting bank stabilization along the shoreline of the Albeni Cove campground within the Albeni Falls Dam Recreation area.

The Corps is expected to begin work in next week on or about Jan. 27. The work should take about three weeks and will include stabilizing the shoreline with rock.

The work is geared towards preventing further deterioration of the swimming spit and campsites and other infrastructure at the Albeni Cove Recreation Area.

During construction there will temporarily be local truck traffic and occasional construction noise. When the project is completed the area will be returned to the pre-construction condition.

The Corps operates Albeni Falls Dam, which regulates the level of Lake Pend Oreille and helps product power as part of the greater Bonneville Power Administration's operations.

Eight recreation areas are owned by the Corps of Engineers, including the Albeni Cove Campground. More information on these campgrounds may be found at <http://www.nws.usace.army.mil/>, and then click on locks and dams, Albeni Falls Dam, and then Recreation.
